

About Us Cookson Electronics

Cookson Electronics is a leading materials science company that provides high performance materials, chemistry and technology solutions to the electronics and surface finishing industries worldwide. The company delivers superior value by providing truly differentiated products, services and support through its Alpha, Enthone and Cookson Electronics - Semiconductor Products businesses. From printed circuit board fabrication and assembly products, to microelectronics packaging materials and semiconductor fabrication processes, to high performance functional and decorative coatings, we look forward to serving you worldwide.

Cookson Group

Cookson Electronics is a division of Cookson Group plc, a leading materials technology company that provides materials, processes and services to customers worldwide. Through three strategic business divisions - Electronics, Ceramics and Precious Metals - Cookson companies provide specialized industrial materials and equipment for the electronics, precious metals and ceramics industries.

Headquartered in London, Cookson employs over 13,500 people in more than 35 countries and sells its products in over 100 countries.

Alpha

Alpha is the global leader in the development, manufacturing and sales of innovative materials used in electronic assembly processes. With a unique worldwide presence in 50 locations throughout the Americas, Europe and the Asia/Pacific region, Alpha supplies a full line of Solder Paste, Stencils, Squeegee Blades, Stencil & PCB Cleaners, Bar Solder, Cored Wire Solder, Wave Soldering Fluxes, component cooling devices and SMD Adhesives.

Alpha has been committed to developing and manufacturing the highest quality soldering materials. That tradition continues today through its innovative products, including its line of environmentally friendly, lead-free electronic assembly products.

Enthone

Enthone makes everything you see, and many things you don't see, last longer, work better and look more beautiful. Our coatings add value to a diversity of metals, plastics and other substrates by improving or changing performance characteristics, extending product life, and adding value. Leading OEMs worldwide depend on Enthone to enhance wear and corrosion protection, improve appearance, and enable electronic performance. A global supplier of high performance specialty chemistry, coatings and materials to the electronics and surface finishing industries, Enthone has manufacturing sites, research and development facilities, as well as sales and distribution centers worldwide. With a commitment to quality and customer satisfaction, all Enthone plants are ISO 9000 certified.
